Nutrition Guidelines (Vegetarian)

1. Calorie Goal

- Rough estimate for a 24-year-old sedentary male/female of 94 kg:
≈ **2,300 kcal/day** to maintain.
- Aim for ~ **1,800–2,000 kcal/day** (≈ 400–500 kcal deficit). This is safe and sustainable.

2. Macronutrient Split (approx.)

- **Protein:** 20–25 % (≈ 90–110 g) – essential for preserving lean muscle.
- **Carbs:** 45–50 % (mostly complex, high-fiber).
- **Fats:** 25–30 % (mostly unsaturated).

3. Meal Structure – 3 main meals + 1-2 snacks

Meal	Example (≈ 400-500 kcal)
Breakfast	• 1 cup rolled oats cooked with water + ½ cup low-fat milk • 1 tbsp chia seeds
